

LET IT COUNT®

BIHAR UP-CLOSE: TIME TO MOVE THE NEEDLE

Last month, Let It Count travelled across Bihar to see our shortlisted non-profit partners in action—leaders, field teams, and most importantly, beneficiaries – an important part of our Due Diligence process. We weren't chasing anecdotes; we were verifying whether resources reliably become meaningful outcomes.

WHAT WE LOOK FOR

Voice of Beneficiaries

Feedback from communities on operations and on-ground impact.

Continuity of care

Services and support that sustain results beyond the first year.

Independent Validation

Third-party checks alongside transparent, open reporting.

Sustainability levers

Capacity, co-funding and local ownership built in.

Data in practice

Simple tools that guide daily action and track progress.

BIHAR PROJECTS WHAT'S HAPPENING ON THE GROUND.

A. Restoring Sight, Building Women's Careers

Over 600+ eye-surgeries everyday | Village camps identify cataract cases and help people reach surgery with transport, counselling, medicines and follow-ups. Alongside clinical care, young women train as optometrists with residential support and job placement, creating skilled local work and stronger eye-care systems.

B. Strengthening TB Care Systems

55,000+ people reached through community TB care | Doorstep screening and sample collection connect patients quickly to labs, and access to treatment. Clinics receive hands-on training and simple trackers so teams can act on missed doses and late follow-ups, raising completion rates and protecting families.

C. Bridging Opportunity Gaps in Education

2,500 youth directly engaged each year | First-generation adolescents join a fellowship program that blends study support with leadership, constitutional values, digital skills and career navigation.

D. From Survivor to Advocate

At the heart of Trafficking and sexual crimes | In these blocks, community learning centres work on a Preventive and Restoration model – using education, theatre, art and dialogue to teach rights and build voice for the future; rebuild income, agency, and public participation through steady mentorship and market-linked livelihood.

E. Youth Upskilling for New-Economy Jobs

2,000+ youth trained; 5,00,000 reached | Local youth are mobilised into in-house, industry-aligned courses in programming, hospitality and primary healthcare etc., alongside communication, problem solving and digital fluency.

WHY BIHAR (AND WHY NOW)

In Bihar, talent and grit are everywhere but opportunity isn't. In Bihar, each donor rupee typically travels further – turning modest budgets into first-generation graduates, healthy mothers, dignified livelihoods, stronger communities that can withstand the next flood or the sale of their daughters for a meager amount.

So everytime you ignore Bihar, remember it needs funding – not just for charity but smart, catalytic investment in people who are already striving often against the odds.

HOW LET IT COUNT DE-RISKS YOUR GIVING

From partner discovery and Due Diligence to progress Monitoring to compliance, we ensure projects are meaningful, scalable, and safe – with clear targets, simple measurement, budget checks, and clean documentation.
